MSPO CERTIFICATION SCHEME
Supply Chain Certification Standard

Sabah Region – Lahad Datu
13 March 2019
Dewan Serbaguna Plasma, MPOB Lahad Datu
MALAYSIAN PALM OIL CERTIFICATION COUNCIL (MPOCC)

Governing Body for MSPO

- Incorporated in December 2014 under Companies Act 1965
- Started operations in Oct 2015
- Governed by a 13-Member Board of Trustees
  - Oil palm industry associations
  - Academic and R&D institutes
  - Smallholders organisation
  - Government
  - NGOs
  - Civil Society
MPOCC Objectives

To operate a sustainable palm oil certification scheme in Malaysia

To engage with NGOs, institutions of higher learning, trade associations, & accreditation & certification bodies in Malaysia

To establish a mechanism for the certification of entities complying to the requirements of auditable sustainability standards
MPOCC’s Vision & Mission

**Vision**
To be recognised as a leading organisation for palm oil certification

**Mission**
To establish and operate a credible and internationally recognised national palm oil certification scheme towards promoting sustainable management of oil palm in Malaysia
MSPO CERTIFICATION SCHEME

CERTIFYING MALAYSIAN PALM OIL FOR THE WORLD
MSPO Certification Scheme

- MSPO Standards launched in 2013
- Government mandated
- Implemented on a voluntary basis since January 2015
- Mandatory implementation by 31 December 2019 in stages
CERTIFYING MALAYSIAN PALM OIL FOR THE WORLD
The value chain of Malaysian palm oil sector

Small, medium & large estates → Collection centre/Dealers → Palm Oil Mill → Refinery Kernel Crushers Biodiesel Plants Oleochemical → Product manufacturer → Retailers → Consumers

Oil Palm Management Certification
Supply Chain Certification
MSPO Certification Scheme

provides for:

- Application by potential clients for certification audits
- Development of certification standards & scheme documents
- Accreditation & notification of CBs
- Peer reviewing of audit reports
- Supply chain traceability
- Issuance of logo usage licenses
- Handling of complaints
- Training & briefing to auditors & other stakeholders
About MSPO Certification Scheme

**MSPO Standards**
- Sets the requirements & which must be met when audits are done

**Certification System**
- Defines the operations of the scheme, implementation agreement with accredited CBs

**Accreditation Programme**
- To ensure that organisation who undertake audits are credible and have competent auditors
MSPO Standards

MS 2530-1:2013 – Malaysian Sustainable Palm Oil (MSPO) Part 1: General principles

MS 2530-2:2013 – Malaysian Sustainable Palm Oil (MSPO) Part 2: General principles for independent smallholders

MS 2530-3:2013 – Malaysian Sustainable Palm Oil (MSPO) Part 3: General principles for oil palm plantations and organised smallholders

MS 2530-4:2013 – Malaysian Sustainable Palm Oil (MSPO) Part 4: General principles palm oil mills

7 Principles of MSPO

1. Management commitment and responsibility
2. Transparency
3. Compliance to legal requirements
4. Social responsibility, health, safety and employment conditions
5. Environment, natural resources, biodiversity and ecosystem services
6. Best practices
7. Development of new plantings
Institutional Arrangement for MSPO Certification Scheme (Accreditation of CBs & Certification Process)

Notification
Accredited CBs have to apply to Scheme Owner to become notified CBs to enable them to issue accredited certificates recognised by Scheme Owner.

Accreditation
CBs are required to be accredited to national AB.

Malaysian Sustainable Palm Oil (MSPO) Certification Scheme

Accredited Certification Bodies (CBs) / Auditing Service Provider

CBs receive and process applications for certification
CBs conduct audits and make decisions to award MSPO Certificate for Oil Palm Plantation Management or for Supply Chain

Applicants for Oil Palm Management Certification

Applicants for Supply Chain Certification

Peer Reviewing of Audit Report
## Accreditation Requirements for Oil Palm Management Certification

**ISO 17021** - Conformity assessment -- Requirements for bodies providing audit and certification of management systems
### Accreditation Requirements for Supply Chain Certification

| ACB SC/2018 | Requirements for Certification Bodies Operating Supply Chain Certification under the Malaysian Sustainable Palm Oil (MSPO) Certification Scheme |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**ISO 17065 Type 6 - Conformity assessment -- Conformity assessment -- Requirements for bodies certifying products, processes and services**

Type 6 – Applicable to certification of services and processes. Initial and periodic assessment of service or process plus initial assessment and periodic auditing management system.
Standard Setting Process

1) Stakeholder mapping
2) Announcement of the standards-setting process and invitation of stakeholders
3) Creation of the working group/committee
4) Working group/committee-developement of a draft document
5) Public consultation and pilot testing
6) Consensus building on the final draft
7) Formal approval of the standard
8) Publication of the standard

Review of standards (every 5 years)
Approach to MSPO Certification

- Types of MSPO Certification
- Scopes of Certification
- Certification Process
- Proposed Steps to Implement MSPO
Types of MSPO Certification

- Individual entity (plantation, mills, processing facilities)
- Multi-site certification

From The MSPO Certification Scheme and Its Implementation Arrangement
https://www.mpocc.org.my/scheme-documents
Scope of Certification - Plantations

1. Individual Certification

- Estate XYZ
  - MSPO Certificate Part 3
  - Estate TUV
  - Estate ABC

2. Group Certification

- MSPO Certificate Part 3
  - Estate XYZ
  - Estate ABC
  - Group Manager
  - Estate TUV
Scope of Certification – Palm Oil Mills

1. Individual Certification

- Mill A
  - MSPO Certificate Part 4
- Mill B
  - MSPO Certificate Part 4
- Mill C
  - MSPO Certificate Part 4

2. Multi-site Certification

- Mill A
- Mill B
- Mill C
  - Group Manager

www.mpocc.org.my
1. Individual Certification

PF A → MSPO SCCS

PF C → MSPO SCCS

PF B → MSPO SCCS

2. Multi-site Certification

MSPO SCCS → Central Office

PF A

PF C

PF B

Note: Sampling for multi-sites are not allowed (ACB-SC/2018, item 5.3)
Certification Process

Application by potential clients for certification

Certification audit

Certification audit

Draft audit report

CB’s certification committee

Final audit report

MSPO Certificate awarded
(5 years with annual surveillance audits)

3-6 months, subject to closure of Non-Conformities

Note: For Supply Chain Certification audit findings, two general categories ‘corrective action request/non-compliance and observation will be used. (MSPOCS 1/2018, item 7.2)
Proposed Steps to Implement MSPO

1. Understand MSPO Requirements
2. Gap analysis
3. Training process
4. System planning
5. Monitoring and Evaluation of systems
6. Internal Audit
7. Auditing and Certification

Proposed Steps:

1. Understand MSPO Requirements
2. Gap analysis
3. Training process
4. System planning
5. Develop documentation, appoint responsible persons, establish and implement systems
6. Internal Audit
7. Auditing and Certification

MSPO Supply Chain Certification Standard (MSPO SCCS)
The MSPO Supply Chain Standard is designed to provide a credible guarantee to the end user that the palm oil raw material originated from a sustainably managed oil palm plantation throughout the supply chain.

The Malaysian Sustainable Palm Oil Supply Chain Certification Standard (MSPO SCCS) addresses management requirements and traceability of the production throughout the supply chain from the raw materials until processing and manufacturing of palm oil and palm oil based products. Each group of players must perform their respective roles to enable traceability of all activities throughout the palm oil supply chain.

It also allows to claim the use of the MSPO certified palm oil.
<table>
<thead>
<tr>
<th><strong>MSPO S CCS Guidance Document</strong></th>
<th>• To provide guidance for the certification bodies and the user of the MSPO SCCS in the industry on the requirement to comply with MSPO SCCS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Guidance for Oleochemicals and Its Derivatives Under MSPO SCCS</strong></td>
<td>• To provide guidance the oleochemical industry on the conversion rate where the input or outputs are not purely palm-based in compliance with MSPO SCCS.</td>
</tr>
<tr>
<td><strong>Issuance of Logo and Usage License by MPOCC</strong></td>
<td>• To allow the MSPO certified palm oil user to claim the use of certified palm oil product by using MSPO logo on their on-product and off-product.</td>
</tr>
</tbody>
</table>
SCOPE:

The requirements are applicable to organisations which process, manufacture, supply and/or export palm oil products using raw materials which originate from MSPO certified oil palm planted area and/or take legal ownership and physically handle MSPO certified palm oil products throughout the supply chain.

Traceability Elements

MSPO Supply Chain Certification Standard (MSPO SCCS)
**MSPO Supply Chain Models**

- **Segregation**
  - Physical separation of certified and non-certified palm oil products at every stage of the palm oil supply chain.
### Segregation

#### Requirements

| 8.1.2 | The Segregation approach requires that the **MSPO certified palm oil products shall be kept separate from non-MSPO certified palm oil products at every stage of production, processing, refining and manufacturing throughout the supply chain**. This model **allows mixing of any MSPO SG certified palm oil products from various certified sources**. Physical certified palm oil products delivered to the end user shall be traceable to MSPO certified sources.

| 8.1.2.2 | The site shall ensure and verify through clear **procedures and record keeping** that the MSPO certified oil palm products are kept segregated from non-certified palm oil products including during transportation and storage to strive for 100% separation. |
MSPO Supply Chain Models

- Mass Balance
  - Allows the mixing of batches of certified and non-certified palm oil products at every stage of the palm oil supply chain.
Mass Balance

Requirement
8.2.2

8.2.2.1 The basis of the MSPO SCCS requirements for MB shall consist of reconciliation between the quantity of MSPO certified palm oil products bought and the quantity of MSPO certified palm oil products sold. This includes control of purchases and sales of MSPO certified palm oil products and its derivatives which shall be independently verified. **There are no requirements for separate storage, transportation or controls in the production process.**

8.2.2.2 The organisation shall ensure that the quantity of physical MSPO MB palm oil product inputs and outputs (volume or weight) at the physical site are monitored.

8.2.2.3 The organisation shall ensure that the output of MSPO MB palm oil product supplied to customers from the physical site does not exceed the input of MSPO certified palm oil products received at the physical site, using either a continuous accounting system or a fixed inventory period.
### Mass Balance

**8.2.3 Continuous accounting system**

<table>
<thead>
<tr>
<th>Month</th>
<th>MB</th>
<th>Non-Certified</th>
<th>Recorded MB Stock</th>
<th>Physical Stock</th>

<td>0</td>
<td>0</td>
<td>250</td>
<td>500</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.2.3.1 Where a continuous accounting system is in operation, the organisation shall ensure that the quantity of physical MSPO MB palm oil product inputs and outputs at the physical site are monitored on a **real-time basis**.

8.2.3.2 Where a continuous accounting system is in operation, the organisation shall ensure that the material accounting system is **never overdrawn**. Only MSPO data which has been recorded in the material accounting system shall be allocated to outputs supplied by the organisation.
Mass Balance

8.2.4 Fixed inventory periods

8.2.4.1 Where a fixed inventory period is in operation, the organisation shall ensure that the quantity of MSPO MB palm oil product inputs and outputs (volume or weight) are balanced. The fixed inventory period shall be three (3) months.

8.2.4.2 Where a fixed inventory period is in operation, the organisation may overdraw data when there is evidence that MSPO MB palm oil product purchased for delivery within the inventory period cover the MSPO output quantity supplied.

8.2.4.3 Where a fixed inventory period is in operation, unused credits can be carried over and recorded in the material accounting system for the following inventory period.

8.2.4.4 Where a fixed inventory period is in operation, the organisation shall ensure that the material accounting system is not overdrawn at the end of inventory period. Only MSPO data which has been recorded in the material accounting system within the inventory period shall be allocated to outputs supplied within the inventory period.

**Documented procedure for handling non-conforming palm oil products and/or documents**
MS 2530: Part 4

Principles 2: Transparency

Criterion 3: Traceability

**Indicator 1:** The management shall commit itself to implement and maintain the requirements for traceability and shall establish a standard operation procedure for traceability.

**Indicator 2:** The management shall conduct regular inspections on compliance with the established traceability system.

**Indicator 3:** The management shall identify and assign suitable employees to implement and maintain the traceability system.

**Indicator 4:** Records of storage, sales, delivery or transportation of crude palm oil and palm kernel shall be maintained.
Outsourced Activities

Requirement 9.1

Has **legal ownership of all input materials** during the outsourced activities;

Has an **agreement/contract** covering the outsourced activities with each contractor. This agreement/contract shall include a clause reserving the right of the certification body to audit the outsourced contractor; and

Has a **documented control system with procedures** for the outsourced activities which are shared with the relevant outsourced contractor.

4.9 Outsourced Contractors

Parties engaged by the organisation to provide services for transporting, handling and storing certified palm oil products by means of agreement or contract.
**Principle 6: Best Practices**

**Criterion 4: Contractor**

*Indicator 1:* In case of the engagement of contractors, they shall be made to understand the MSPO requirements and shall provide the required documentation and information.

*Indicator 2:* The management shall provide evidence of agreed contracts with the contractor.

*Indicator 3:* The management shall accept MSPO approved auditors to verify the assessments through a physical inspection, if required.
Claims

Requirement 10.1  The organisation shall only make claims on the products that contains MSPO certified material from oil palm planted areas which have been certified for the oil palm management certification standard as being sustainably managed.

Reference: *Issuance of MSPO Logo Usage Licence by MPOCC under the Malaysian Sustainable Palm Oil (MSPO) Certification Scheme* document.
Logo User Groups

Group A: Scheme Owner, i.e. MPOCC

Group B: Oil Palm Management Certificate Holders who have been certified to MSPO Oil Palm Management

Group C: Supply Chain Certificate Holders who have been certified to MSPO Supply Chain

Group D: Other Groups, including certification bodies
On-product Logo

Obtain Logo and Usage License from MPOCC

Certified with MSPO SCCS

Min 70% certified supply based

Supply Chain Models

Registration number provided by MPOCC

Usage of MSPO logo On-Product

certifying Malaysian palm oil for the world | www.mpocc.org.my
On-product

Logo Users must indicate the supply chain model of either the option of Segregation or Mass Balance of the content of the MSPO certified material in the product.

• Supply Chain Model
  ➢ The option of Segregation or Mass Balance to indicates the management tool used to communicate supply chain management decision with suppliers and customers on MSPO certified raw material in the product.

• Label Implies
  ➢ The product must contain a minimum of 70% of MSPO certified material from oil palm planted areas which have been certified against the oil palm management certification standard as sustainably managed. The content of the MSPO certified material is verified through supply chain certification.

✓ Claim on the label (e.g. PET bottle, plastic packaging, boxes, drums)
Off-product Logo

Usage of MSPO logo

Certified with MSPO

Obtain Logo and Usage License from MPOCC

Min 70% certified supply based

Registration number provided by MPOCC

certifying Malaysian palm oil for the world | www.mpocc.org.my
Off-product
The logo for off-product use shall adhere to MSPO Logo Reproduction Tool Kit with the exception of the size of the logo, which shall remain flexible and legible.

In off-product use, Logo Users must use the logo with the logo licence number that is issued.

✓ Claim in the product documentation (e.g. invoice, packaging list and bill of lading)
✓ Claim in general documentation (e.g. company or product brochure)
✓ Claim in signage (e.g. at an organisation’s premises or at boundary of oil palm planted area)
Logo License Issuance Procedure

1. Submit Application via MPOCC website for applicants in Logo User Groups B, C and D
2. Applicant submits together the copy of Certificate for Logo User Groups B, C and/or D
3. MPOCC review documentation and decides on logo licence issuance
4. Ongoing surveillance of logo usage. Certification body to review use of logo through its surveillance audits, and report unapproved and/or nonconforming usage
5. MPOCC issues to Applicant:
   - Logo usage license registration number
   - Logo Reproduction Tool Kit
   - Document on Issuance of MSPO Logo Usage License
6. MPOCC and the Applicant sign Logo Usage License Agreement

Management Requirement

Management System

5.1 Sustainability Policy
✓ Established and communicate the sustainability policy

5.2 Management Representative
✓ Appoint a management representative who responsible for implementation of MSPO requirements

5.3 Record keeping
✓ Established and maintain related records for 3 years
Principles 2: Transparency

Criterion 3: Traceability

**Indicator 1**: The management shall commit itself to implement and maintain the requirements for traceability and shall establish a standard operation procedure for traceability.

**Indicator 2**: The management shall conduct regular inspections on compliance with the established traceability system.

**Indicator 3**: The management shall identify and assign suitable employees to implement and maintain the traceability system.

*(Requirement 5.2 : Management Representative)*

**Indicator 4**: Records of storage, sales, delivery or transportation of crude palm oil and palm kernel shall be maintained.
Management Requirement

5.4 Procedures
✓ Established Standard Operating Procedure (SOP)

5.5 Internal Audit
✓ Conduct internal audit at planned and implement corrections and corrective actions

5.6 Management Review
✓ Conduct management review at planned intervals
Principle 1: Management commitment and responsibility

Criterion 2: Internal audit

(Requirement 5.5 : Internal Audit)

Indicator 1: Internal audit shall be planned and conducted regularly to determine the strong and weak points and potential area for further improvement.

Indicator 2: The internal audit procedures and audit results shall be documented and evaluated, followed by the identification of strengths and root causes of nonconformities, in order to implement the necessary corrective action.

Indicator 3: Reports shall be made available to the management for their review.
MS 2530:Part 4

Principle 1: Management commitment and responsibility

Criterion 3: Management review

(Requirement 5.6: Management Review)

Indicator 1: The management shall periodically review the continuous suitability, adequacy and effectiveness of the requirements for effective implementation of MSPO and decide on any changes, improvement and modification.
Management Requirement

6.1 Competency & Training
✓ Provide trainings to employee
✓ Established training plan
✓ Keep the training records of
**MS 2530: Part 4**

**Principle 4: Social responsibility, health, safety and employment condition**

**Criterion 6: Training and competency**

*Indicator 1:* All employees and contractors shall be appropriately trained. A training programme shall include regular assessment of training needs and documentation, including records of training.

*Indicator 2:* Training needs of individual employees shall be identified prior to the planning and implementation of the training programmes in order to provide the specific skill and competency required to all employees based on their job description.

*Indicator 3:* A continuous training programme shall be planned and implemented to ensure that all employees are well trained in their job function and responsibility in accordance to the documented training procedure.
Management Requirement

11.1 Complaints and Grievances
✓ To establish, implement and documented the procedure of complaints and grievances.
Principle 4: Social responsibility, health, safety and employment condition

Criterion 2: Complaints and grievances

**Indicator 1:** A system for dealing with complaints and grievances shall be established and documented.

**Indicator 2:** The system shall be able to resolves disputes in an effective, timely and appropriate manner, which is accepted by all parties.

**Indicator 3:** A complaint form should be made available at the premises, where employees and affected stakeholders can make complaints.

**Indicator 4:** Employees and surrounding communities should be made aware of its existence and that complaints or suggestions may be made at any time.

**Indicator 5:** Complaints and solutions within the past 24 months shall be documented and be made available to affected stakeholders upon request.
Management Requirement
